

Novembre 2015

To whom it may concern,

Several colours we use for SizzlePak[®] and SizzleFine[®] are tested in a representative mix of shades.

All tested colours were approved for direct contact with dry and not fatty food. In order to avoid any misunderstandings we have decided not to recommend any coloured paper for contact with moist food.

Furthermore the papers were tested for release of heavy metals and fulfilled the requirements according to DIN EN 71, part 3 "Safety for toys".

The following grades of SizzlePak are tested :

- | | |
|------------------|--------------|
| - Natural 011 | - Lilac 086 |
| - Cool Grey 023 | - Pink 123 |
| - Orange 048 | - White 200 |
| - Ivory 052 | - Purple 255 |
| - Green 063 | - Brown 315 |
| - Lime Green 066 | - Blue 437 |
| - Sky Blue 072 | - Cream 535 |
| - Turquoise 077 | |

This means that Deep Red / Forest Green / Black / Cognac / Cobalt / White / Bright Red / Yellow / Burgundy / Chocolate / Navy Blue / Ivory / Green Tea / White / Sky Blue / Green / Lime Green / Orange / Pind / Purple / Brown / Lilac / Turquoise / French Vanilla / Silver and Gold are not suitable for contact with dry and fatty food.
